Uninet i560: How to Turn OFF the Energy Saving Mode

Ready to Print on the Display:

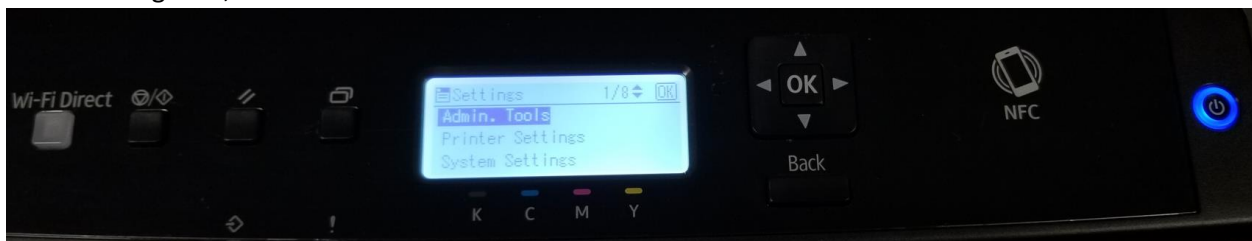

Press the Menu Button:

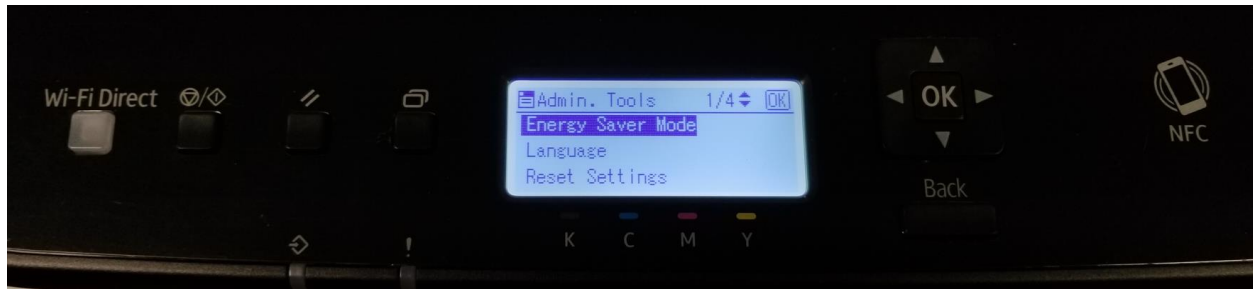

When you Press the Menu Button, this is going to show the Settings List.

In the Settings List, Select **ADMIN. TOOLS** and Press **OK**

In the **ADMIN. TOOLS**, the first selection would be **ENERGY SAVER MODE**. Press **OK**

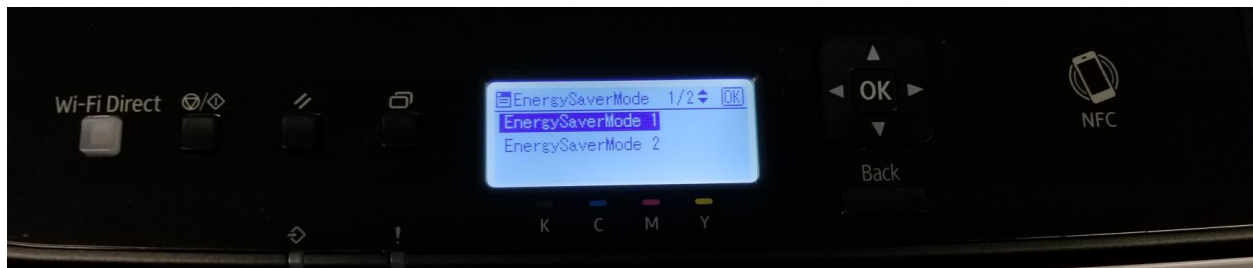

When you are in the **ENERGY SAVER MODE** will have 2 selections:

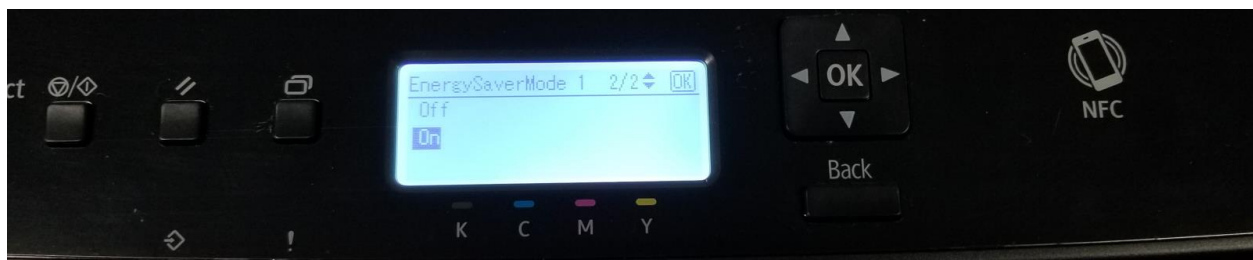

ENERGY SAVER MODE 1

ENERGY SAVER MODE 2

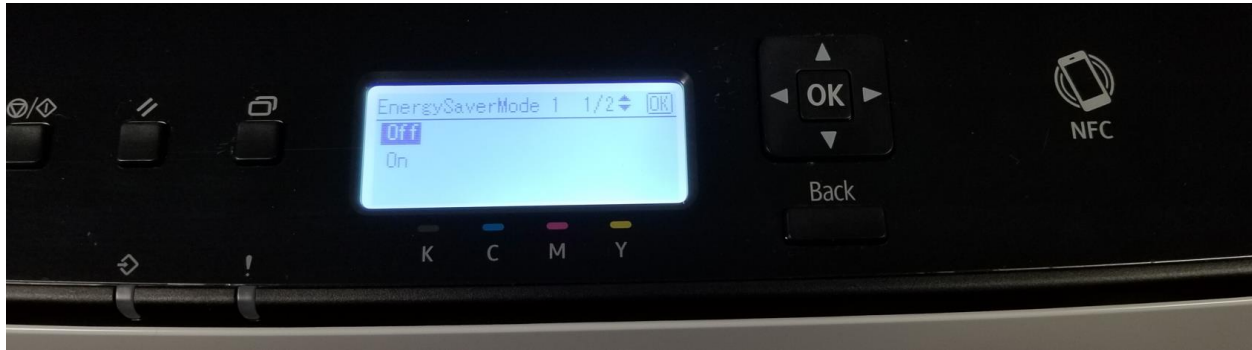

Select **ENERGY SAVER MODE 1**:

By Default, this feature will be **ON**

Press the **UP ARROW** to move the setting to **OFF**:

Then **Press OK**

This will turn off the Energy Saver and keep the machine from going into “Sleep Mode”. **The Energy Saver 2** is still active and when the machine has been idle for 60min, then the printer will then go into “Sleep Mode”
